Project Name	
Maximum Marks	2 Marks

Problem – Solution Fit Template:

The Problem-Solution Fit simply means that you have found a problem with your customer and that the solution you have realized for it actually solves the customer's problem. It helps entrepreneurs, marketers and corporate innovators identify behavioral patterns and recognize what would work and why

Purpose:

- ☐ Solve complex problems in a way that fits the state of your customers.
- ☐ Succeed faster and increase your solution adoption by tapping into existing mediums and channels of behavior.
- ☐ Sharpen your communication and marketing strategy with the right triggers and messaging.
- ☐ Increase touch-points with your company by finding the right problem-behavior fit and building trust by solving frequent annoyances, or urgent or costly problems.
- ☐ **Understand the existing situation in order to improve it for your target group.**

Template:

1. CUSTOMER SEGMENT(S) CS i.e. working parents of 0-5 y.o. kids	6. CUSTOMER CONSTRAINTS CC What constraints prevent your customers from taking action or limit their choices of solutions? i.e. spending power, budget, no cash, network connection, available devices.	5. AVAILABLE SOLUTIONS AS Which solutions are available to the customers when they face the problem or need to get the job done? What have they tried in the past? What pros & cons do these solutions have? i.e. pen and paper is an alternative to digital notetaking
2. JOBS-TO-BE-DONE / PROBLEMS J&P Who is your customer? There could be more than one, explore different sides.	9. PROBLEM ROOT CAUSE RC What is the real reason that this problem exists? What is the back story behind the need to do this job? i.e. customers have to do it because of the change in regulations.	7. BEHAVIOUR BE What does your customer do to address the problem and get the job done? i.e. directly related: find the right solar panel installer, calculate usage and benefits; indirectly associated: customers spend free time on volunteering work (i.e. Greenpeace)
3. TRIGGERS TR What triggers customers to act? i.e. seeing their neighbour installing solar panels, reading about a more efficient solution in the news.	10. YOUR SOLUTION SL If you are working on an existing business, write down your current solution first, fill in the canvas, and check how much it fits reality. If you are working on a new business proposition, then keep it blank until you fill in the canvas and come up with a solution that fits within customer limitations, solves a problem and matches customer behaviour.	8. CHANNELS of BEHAVIOUR CH 8.1 ONLINE What kind of actions do customers take online? Extract online channels from #7 8.2 OFFLINE What kind of actions do customers take offline? Extract offline channels from #7 and use them for customer development.

Project Fit Summary

The proposed ServiceNow solution directly addresses the identified network request problems by replacing manual handling with a simple, standardized, and trackable workflow.

Project Design Phase
Proposed Solution Template

S.No.	Parameter	Description
1	Problem Statement	Network requests are often handled manually, which can cause delays, incomplete information, incorrect assignment, and limited status visibility.
2	Idea / Solution Description	Use ServiceNow Service Catalog and Flow Designer to automate request submission, validation, approval, assignment, notifications, SLA tracking, and closure.
3	Novelty / Uniqueness	A centralized and standardized workflow reduces repeated manual steps and gives requesters and support teams better visibility of request status.
4	Social Impact / Customer Satisfaction	Users get a simple request process, faster updates, and better visibility. Support teams spend less time on repetitive manual work.
5	Business Model (Revenue Model)	This is an internal IT service management solution. It does not require a direct revenue model; the main value is reduced manual effort and improved operational efficiency.
6	Scalability of the Solution	The solution can support additional network request types, approval rules, SLAs, reports, and fulfillment groups within ServiceNow.

Project Design Phase Solution Architecture

Date	15 February 2025
Team ID	
Project Name	
Maximum Marks	4 Marks

Solution Architecture:

- Provide a simple request submission process through Service Catalog.
- Automate validation, approval, assignment, notifications, and SLA tracking.
- Store request information in ServiceNow records for tracking and audit.
- Provide clear status visibility through reports and dashboards.

The solution architecture defines how the ServiceNow components work together to automate network request processing. The design is simple and suitable for a ServiceNow Personal Developer Instance (PDI).

- Find the best tech solution to solve existing business problems.
- Describe the structure, characteristics, behavior, and other aspects of the software to project stakeholders.
- Define features, development phases, and solution requirements.
- Provide specifications according to which the solution is defined, managed, and delivered.

Automated Network Request Management in ServiceNow
